

Course: GDPR: Organisational & Technical security measures

Course overview

This course aims to describe and explain what does the Regulation (EU) 2016/679 provide for the implementation of security measures and why an organisation should implement security measure for the protection of personal data in process. It aims to explain how an organisation can decide for the security measures to be implemented and provides a number of examples of organizational and technical security measures. The course also aims to describe and explain the necessary documentation that an organisation should have in place to respond to data subjects rights and to a data breach.

Course Description

This course describes the reason why an organisation should implement security measures to secure the processing of personal data and describes what documents an organisation should have in place in order to respond to data subjects' requests and possible data breaches. The course provides a number of examples of security measures. It also describes in brief about the necessary documentation to be developed and explains what these documents shall include by providing examples/templates of these documents.

Topics covered

The course covers the following topics:

- The need to have security measures in place and how can decide what security measures to implement
- Examples of security measures
- Pseudonymisation and Encryption explained
- The data subject's rights in detail
- Examples of documents to be in place in order to respond to data subject's rights
- Data breach in brief
- The necessary documents to notify the Supervisory Authority and data subjects in case of a breach

Course Duration

This course may take up to 2 hours to be completed. However, actual study time differs as each learner uses their own training pace.
